“We’re going to have to force behaviors… whether it’s gender or race.” - Larry Fink, BlackRock (UJA/Mossad/Aladdin) & WEF

Interesting you should mention this back in September of 2024, @IanMalcolm84! This happens to go right in alignment with what my guy @7SEES_ and I have uncovered about JD Vance and what I’ve written about the Aladdin platform and the players behind it. It’s especially relevant now, considering BlackRock Chairman Larry Fink was just tabbed to replace Klaus Schwab as Chairman of the World Economic Forum.

(Hint: It was Mossad/IDF Unit 8200 Soviet/Zio/Bolshevik Jew supremacist criminals all along.)

January 31, 2022 – **Dr. Bennett W. Golub** and **Dr. Cheryl Fishbein** were elected as President and Chair, respectively, of the Jewish Community Relations Council of NY (JCRC-NY).

Dr. Bennett W. Golub will assume the role of President of JCRC-NY on July 1st and will serve as President-elect until that date. Much like his predecessor, Ben has shown dedication to the Jewish community over the span of his career and has been involved with JCRC-NY for over a decade. His contributions to the organization have been vital to JCRC-NY's success, leading him to become a recipient of the JCRC-NY Continuing Legacy Award in 2010. The following year, Ben was elected to the Board of Directors and currently serves as an Observer on our Executive Committee.

Professionally, Ben is the founder of BlackRock, Inc., a member of its Global Executive Committee and co-head of its Risk and Quantitative Analysis Group. He has served as BlackRock's Chief Risk Officer since 2009. Since the company's inception in 1988, Ben has organized and led BlackRock's UJA-Federation campaign. He also serves on the Investment Committee of the Claims Conference and co-authored "Kaddishel – A Life Reborn" with his father, Aharon, z'l, which details Aharon's experiences during the Holocaust and his subsequent immigration to British Mandate Palestine in 1946.

In his personal life, Ben has been married to Cindy Golub for almost 35 years and is the proud father of Alexandra, Phillip and Jill Golub and grandfather of Tara Golub.

JCRC-NY is extremely confident in the election of **Dr. Bennet Golub** as President of the Jewish Community Relations Council of New York.

Dr. Cheryl Fishbein is the current President of JCRC-NY and will assume the role of Chair on July 1st. Cheryl has a history of exemplary leadership to the Jewish community including serving as the Past Chair of the Jewish Council for Public Affairs, and has served on the Executive Council of the Conference of Presidents of Major Jewish Organizations. She is currently active in UJA-Federation New York, serves on its President's Advisory Board, and is past chair of the Campaign Department, the Missions Committee and the

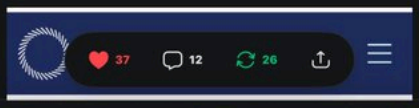
Aladdin Part 2: The Silicon Valley Tech Genies Inside Israel's Lamp.

Eric Schmidt - From Sun Microsystems CTO to Innovation Endeavors Founding Partner and his "everything else" in between.

DECENT TM JONATHAN
JUN 8, 2025 AT 3:09 AM

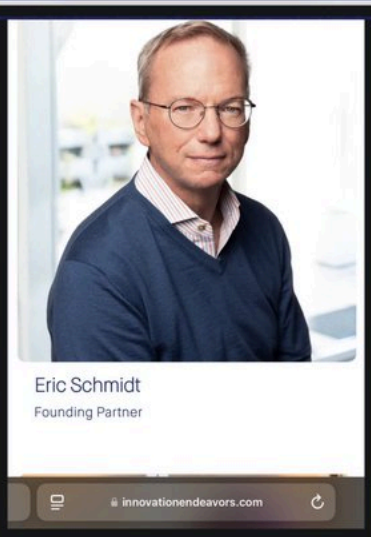
As is often the case, whenever something sounds too good to be true, it ~~usually~~ almost *always* is. Whether it's an investment firm with a decades-long track record, demonstrating an uncanny "knack" for *always* timing the global markets *perfectly*, or it's a mythical tech founder whose startup *prophetically* answered all of the world's most pertinent questions, long before anyone else on the planet bothered to ask or even knew they had them. That's how I'd describe most bios of the larger-than-life "tech geniuses" adorning today's "Mount Rushmore" of revolutionary Silicon Valley startup founders. Eric Schmidt is certainly no exception. In fact, Eric Schmidt might actually be George Washington himself.

So, who the hell is this Eric Schmidt guy, *really*?



So, who the hell is this Eric Schmidt guy, *really*?

Welp. If "your network determines your net worth," and a legacy is any indication, Eric Schmidt might actually be the glowiest glow stick in the history of Silicon Valley Big~~Tech founders. Not e~~ven kidding. But before we get into his heritage and supervillain origin story, I believe in doing first things first. As I addressed in autistic-level detail with my first Aladdin and BlackRock Substack article from a few weeks back, Israel's ultimate weapon of global financial manipulation and market control (and warfare) is CLEARLY the Aladdin platform, which was first rolled out by BlackRock in 1988. Or perhaps more accurately, *Aladdin first rolled out BlackRock* in 1988. Aladdin



Welp. If "your network determines your net worth," and a legacy is any indication, Eric Schmidt might actually be the glowiest glow stick in the history of Silicon Valley BigTech founders. Not even kidding. But before we get into his heritage and supervillain origin story, I believe in doing first things first. As I addressed in autistic-level detail with my first Aladdin and BlackRock Substack article from a few weeks back, Israel's ultimate weapon of global financial manipulation and market control (and warfare) is CLEARLY the Aladdin platform, which was first rolled out by BlackRock in 1988. Or perhaps more accurately, *Aladdin first rolled out BlackRock* in 1988. Aladdin

In the article linked above, we discussed how the Aladdin platform was developed largely by two Sun Microsystems programmers in 1988, one of them being a Mossad asset named Dr. Benett Golub, who ran the UJA-BlackRock program since the inception of BlackRock itself. The other was Charles Hallac, who is widely credited with having initially "invented" Aladdin, and then working with Golub developing calculations for risk assessment pertaining to collateralized debt (mortgage) obligations.... which would later become the CDOs and CMOs that led to the 2008/2009 housing market crisis and crash.

But there's another key piece to this. Several key pieces, in fact. Those pieces include Vinod Khosla and his small group of fellow Sun Microsystems Co-Founders, many (most) of which have gone on to become household names in their own endeavors and VC enterprises.

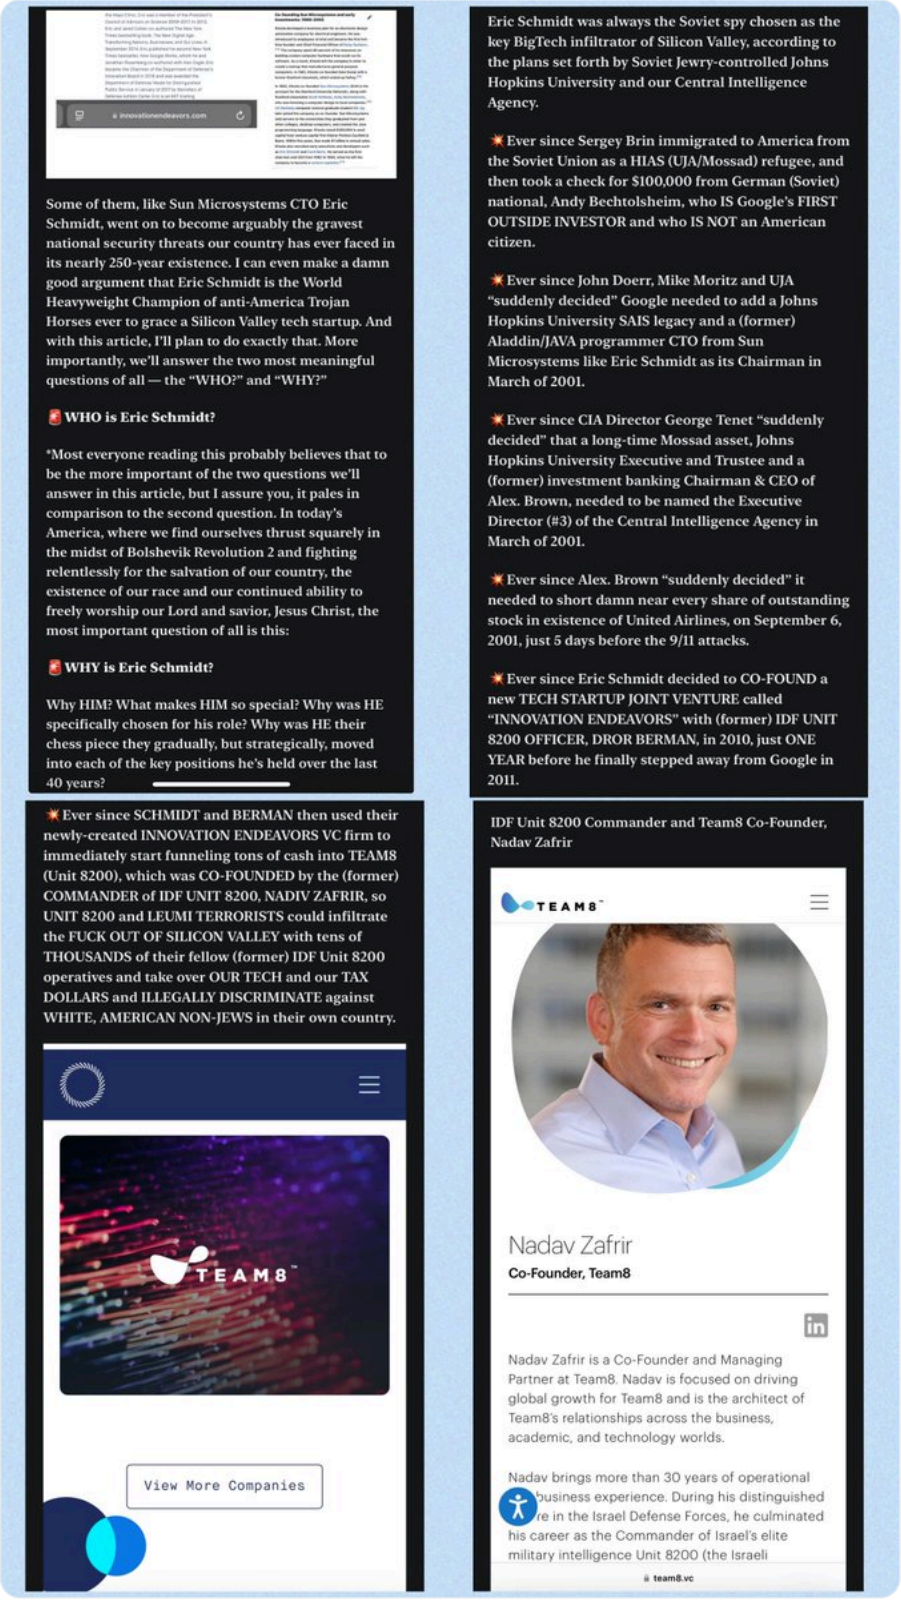
Every inch you give, they'll take in miles...

JD Vance, when he went by James Bowman, worked at American Enterprise Inc. (AEI) which was a PR firm financed by Purdue Pharma, run by the Sackler Family. AEI was a detrimental part of the opioid crisis, helping to spin public Show more



Some of them, like Sun Microsystems CTO Eric Schmidt, went on to become arguably the gravest national security threats our country has ever faced in its nearly 250-year existence. I can even make a damn good argument that Eric Schmidt is the World Heavyweight Champion of anti-America Trojan Horses ever to grace a Silicon Valley tech startup. And with this article, I'll plan to do exactly that. More importantly, we'll answer the two most meaningful questions of all — the "WHO?" and "WHY?"
WHO is Eric Schmidt?
*Most everyone reading this probably believes that to be the more important of the two questions we'll answer in this article, but I assure you, it pales in comparison to the second question. In today's America, where we find ourselves thrust squarely in the midst of Bolshevik Revolution 2 and fighting relentlessly for the salvation of our country, the existence of our race and our continued ability to freely worship our Lord and savior, Jesus Christ, the most important question of all is this:
WHY is Eric Schmidt?
Why HIM? What makes HIM so special? Why was HE specifically chosen for his role? Why was HE their chess piece they gradually, but strategically, moved into each of the key positions he's held over the last 40 years?
Eric Schmidt was always the Soviet spy chosen as the key BigTech infiltrator of Silicon Valley, according to the plans set forth by Soviet Jewry-controlled Johns Hopkins University and our Central Intelligence Agency.
Ever since Sergey Brin immigrated to America from the Soviet Union as a HIAS (UJA/Mossad) refugee, and then took a check for $100,000 from German (Soviet) national, Andy Bechtolsheim, who IS Google's FIRST OUTSIDE INVESTOR and who IS NOT an American citizen.
Ever since John Doerr, Mike Moritz and UJA "suddenly decided" Google needed to add a Johns Hopkins University SAIS legacy and a (former) Aladdin/JAVA programmer CTO from Sun Microsystems like Eric Schmidt as its Chairman in March of 2001.
Ever since CIA Director George Tenet "suddenly decided" that a long-time Mossad asset, Johns Hopkins University Executive and Trustee and a (former) investment banking Chairman & CEO of Alex. Brown, needed to be named the Executive Director (#3) of the Central Intelligence Agency in March of 2001.
Ever since Alex. Brown "suddenly decided" it needed to short damn near every share of outstanding stock in existence of United Airlines, on September 6, 2001, just 5 days before the 9/11 attacks.
Ever since Eric Schmidt decided to CO-FOUND a new TECH STARTUP JOINT VENTURE called "INNOVATION ENDEAVORS" with (former) IDF UNIT 8200 OFFICER, DROR BERMAN, in 2010, just ONE YEAR before he finally stepped away from Google in 2011.
Ever since SCHMIDT and BERMAN then used their newly-created INNOVATION ENDEAVORS VC firm to immediately start funneling tons of cash into TEAM8 (Unit 8200), which was CO-FOUNDED by the (former) COMMANDER of IDF UNIT 8200, NADIV ZAFRIR, so UNIT 8200 and LEUMI TERRORISTS could infiltrate the FUCK OUT OF SILICON VALLEY with tens of THOUSANDS of their fellow (former) IDF Unit 8200 operatives and take over OUR TECH and our TAX DOLLARS and ILLEGALLY DISCRIMINATE against WHITE, AMERICAN NON-JEWS in their own country.

Former Medicare Director, UnitedHealth Executive Joins Former NSA Director at Team8 to Build Companies Across Digital Health, Cybersecurity, and Fintech

Share

NEW YORK & TEL AVIV--(BUSINESS WIRE)--Team8, a leading company-building venture group backed by partners including Microsoft, Walmart, Cisco, Temasek, and Moody's, today announced that Demetrios L. Kouzoukas, a former Medicare and United Healthcare executive, will join Team8 Health, a new digital health foundry focused on building and scaling transformative digital health companies. He joins former National Security Agency (NSA) Director and Team8 Operating Partner Adm. Michael Rogers, who joined Team8 in 2018.

Mr. Kouzoukas will join Team8 Health to apply this approach to digital health. He brings more than two decades of experience in healthcare leadership roles at the highest levels of the federal government and in industry. Prior to joining Team8 Health, he was chief executive of the Medicare program at the Centers for Medicare & Medicaid Services (CMS) and a senior executive in United Healthcare's Medicare business. Earlier in his career, Demetrios led regulatory policy across the U.S. Department of Health and Human Services (HHS).

Mr. Kouzoukas's track record of success in healthcare leadership includes substantial experience in evolving regulatory and reimbursement frameworks, developing new business models, navigating privacy and data challenges, and operating at scale. His deep understanding of Medicare rules and regulations will also be invaluable to Team8 Health as it designs companies ready to compete in the digital health space, where both regulatory and reimbursement models are still fluid.

"We welcome Demetrios and look forward to his leadership at Team8 Health. Together, we're in a unique position to apply lessons learned from other sectors, including intelligence, to shared pain points in healthcare," said Adm. Rogers. "We're finally at a place technologically where we can not only collect and

Team8 Health will collaborate with prominent healthcare organizations and industry experts to

Team8 Health will collaborate with prominent healthcare organizations and industry experts to identify the greatest unmet needs where new solutions would have the biggest impact. If there is a viable digital health market opportunity and a clear path to adoption, Team8 will partner with founders to design and build a company with a specific solution to meet the need. Team8 Health plans to build 6-8 digital healthcare companies over the next five years, investing $5-$10 million in seed funding in each company and an additional amount through in-kind resources and services.

Team8 Health was first conceived of by Team8 Managing Partners and Founding members Yuval Shachar and Israel Grimberg. In addition to Mr. Kouzoukas, Team8 Health will be led by Kinneret Livnat Savitzky, Ph.D., a biotech executive; Assaf Mischari, Team8 founding member and former CTO of the Israeli Defense Force Unit 8200's Cyber Division; and Prof. Varda Shalev, a primary care physician and the former founder and head of the Maccabi Research & Innovation Institute, the innovation arm of Israel's second largest HMO.

"The healthcare system has the highest impact on people's lives but is one of the most complex and hence challenging for many tech entrepreneurs to navigate. As a healthcare operator with extensive executive experience into how the healthcare system functions, Demetrios brings unparalleled perspective to identifying, mentoring, and scaling successful digital health companies," said Yuval Shachar, managing

And you ALMOST got away with it, Eric. Almost.
takes a deep breath
Ok, folks. Now that we've answered the "WHO" and "WHY" of Eric Schmidt, without even getting into his government roles at the Department of Defense Innovation Board and at the AI NatSec Council, the

Yo, @7SEES_! Fantastic work on JD VANCE, the SACKLER FAMILY and all the PURDUE PHARMA horseshit from the heinous OPIOID CRISIS. Props!🫡

Btw, speaking of the OPIOID CRISIS, wasn't MCKINSEY & CO., the MOSSAD-front "CONSULTING FIRM", also hugely involved in the opioid racket as well?

And wasn't MCKINSEY & CO. forced to pay out something to the tune of like $650,000,000 in fines, penalties and restitution for their role in the scandal?

(Or am I misremembering? My brain tends to do that a lot these days lol.)

I only ask because…

👺HARVEY GOLUB is/was a SENIOR PARTNER at MCKINSEY & CO. and a TRUSTEE at the MANHATTAN INSTITUTE (AIG/CIA), right alongside MAURICE GREENBERG (AIG Chairman & CEO), BILL BARR (CIA/DONALD BARR/JEFFREY EPSTEIN) and BETSY DEVOS (ERIK PRINCE/SEPT 11/BLACKWATER/ALVIN KRONGARD/MOSSAD).

Small world, amirite?

👺Oh, before I forget, HARVEY GOLUB was also NON-EXECUTIVE CHAIRMAN of AIG, appointed in the wake of the 2008/2009 HOUSING CRISIS (largely created by AIG) that happened as a result of fraudulent overinflation of the "CDO/CMO/MBS/SWAP" pooled, mortgage-backed ("collateralized") debt securities markets.

👺Gee, I wonder if DR. BENETT GOLUB, the newly-anointed CHAIRMAN of JEWISH COMMUNITY RELATIONS COUNCIL OF NEW YORK (Mossad), the former SUN MICROSYSTEMS COLLEAGUE of ERIC SCHMIDT, the CO-CREATOR of the ALADDIN (BlackRock/UJA) PLATFORM and the DIRECTOR of the "BLACKROCK/UJA ALADDIN PROGRAM" since the INCEPTION of ALADDIN/BLACKROCK in 1988, knows HARVEY GOLUB. Probably just a Cohencidence™.

🚨FUN FACT: As AIG was busy receiving arguably the LARGEST BAILOUT IN U.S. HISTORY from HANK PAULSON and BEN BERNANKE in the wake of the 2008 HOUSING CRISIS, I bet you'll NEVER GUESS which firm was chosen to be CUSTODIAN FOR THE U.S. TREASURY SECURITIES being sold to BAILOUT AIG and MAURICE GREENBERG.

(HINT: It was BLACKROCK lol.)

🚨Come to think of it, CDO/CMO/MBS products were the whole reason DR. BENETT GOLUB initially JOINED IN on CHARLES HALLAC'S ALADDIN work over at SUN MICROSYSTEMS. Right after CHARLES HALLAC had begun initial development for the ALADDIN PLATFORM, DR. BENETT GOLUB was brought in to see how accurately ALADDIN'S "predictive analytics" computing network could "predict risk" (and manipulate, if necessary) in those high-risk securities products markets.

👺PS: Oh, yeah… ERIC SCHMIDT is a DUAL CITIZEN of the UNITED STATES and CYPRUS. That's just a neat little super-relevant tidbit to take with you.

January 31, 2022 – **Dr. Bennett W. Golub** and **Dr. Cheryl Fishbein** were elected as President and Chair, respectively, of the Jewish Community Relations Council of NY (JCRC-NY).

Dr. Bennett W. Golub will assume the role of President of JCRC-NY on July 1st and will serve as President-elect until that date. Much like his predecessor, Ben has shown dedication to the Jewish community over the span of his career and has been involved with JCRC-NY for over a decade. His contributions to the organization have been vital to JCRC-NY's success, leading him to become a recipient of the JCRC-NY Continuing Legacy Award in 2010. The following year, Ben was elected to the Board of Directors and currently serves as an Observer on our Executive Committee.

Professionally, Ben is the founder of BlackRock, Inc., a member of its Global Executive Committee and co-head of its Risk and Quantitative Analysis Group. He has served as BlackRock's Chief Risk Officer since 2009. Since the company's inception in 1988, Ben has organized and led BlackRock's UJA-Federation campaign. He also serves on the Investment Committee of the Claims Conference and co-authored "Kaddishel – A Life Reborn" with his father, Aharon, z'l, which details Aharon's experiences during the Holocaust and his subsequent immigration to British Mandate Palestine in 1946.

In his personal life, Ben has been married to Cindy Golub for almost 35 years and is the proud father of Alexandra, Phillip and Jill Golub and grandfather of Tara Golub.

JCRC-NY is extremely confident in the election of **Dr. Bennet Golub** as President of the Jewish Community Relations Council of New York.

Ok, folks. Now that we've answered the "WHO" and "WHY" of Eric Schmidt, without even getting into his government roles at the Department of Defense Innovation Board and at the AI NatSec Council, the most important REMAINING question is simply "HOW?"

And I mean, "How do WE now go about destroying this terrorist operative who has harmed tens of millions of innocent lives and has been arguably the lynchpin of Soviet Jewry as they attempt to irreparably infiltrate our country and turn us into a vassal slave state?"

By the way, I'm not posing the question to you as someone who is clueless as to how we address this situation, or who is bereft of any viable ideas for workable, reasonable solutions. I'm asking because I need your help in this endeavor and am once again making a call to action for YOU. Please. The hour is much later than you think. And though we ARE winning and we WILL win, it won't be possible without all of us standing humbly, yet courageously together in total solidarity against our common enemy.

This article is the second in what appears will be rather lengthy series of articles unwinding the apparatus they've constructed against us and most key operatives who served as the architects of that apparatus. At least ONE of the next articles in the series, probably more than one, will discuss (and invite discussion) possible solutions that can and WILL be effective against what seems to be an absolute juggernaut of a collectivist foe.

In closing, I leave with these sage words from a rather sage text:

"If God be for us, who can be against us."

Please do me a solid and share this and any of my other articles you feel may bring valued insight to those in your orbit. It's gonna be a team effort in waking the remaining holdouts up as well. Haha. Until next time, gang. Cheers.

🙏🥂🇺🇸🤜

Regards,

Decent™ Jonathan

PS: I attached this link to one of my TwitterX posts/ threads in the body of this article a couple of days ago and then forgot what the post was about... but regardless, I'm leaving it in lol. Because it's way too late and I'm way too tired right now to GAF lmao.

PPS: *CYPRUS*

ERIC SCHMIDT, IDF UNIT 8200 & VAVADA

I should apologize for sandbagging, but it's probably worth mentioning that Eric Schmidt is also a dual citizen with Cyprus, where Cerberus, IDF Unit 8200 and a few NSO spin-offs conduct many of their American elections infiltration and fraud operations, as well as hacking the financial systems in Brazil and Colorado and stealing U.S. energy and nuclear secrets.

Btw, they also do tons of bribery ops and election fraud, especially in Pennsylvania elections, through FBME Bank in Cyprus and via Online Gaming (Casino) platforms, like Relax Gaming, from their new VAVADA Headquarters in NICOSIA, CYPRUS, nbd.

cough Shapiro *cough* Portnoy *cough*

MCKINSEY & CO., PURDUE PHARMA, OXY

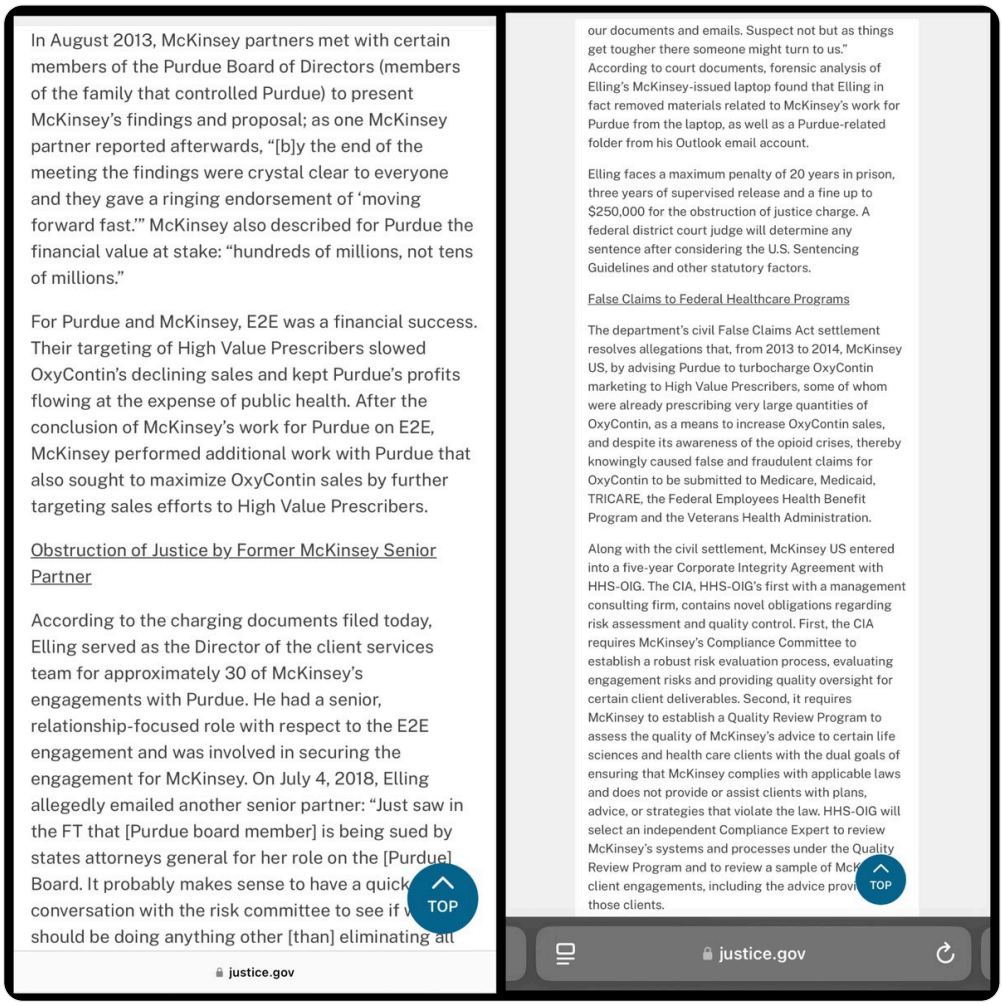
Aww, shucks. Accidentally found these.🤣

As it turns out, not only was MCKINSEY & CO. "also involved" in the PURDUE PHARMA "OPIOID CRISIS" RACKET, MCKINSEY & CO. was literally the firm ADVISING PURDUE PHARMA DIRECTLY on HOW TO CARRY OUT THE RACKET, to INCREASE OXYCONTIN SALES!

Meanwhile, MCKINSEY & CO. was ALSO FAILING TO DISCLOSE its own DOUBLE-DIPPING ACTIVITIES and BUSINESS CONFLICTS OF INTEREST to the FDA.

Holy. Fucking. YIKES.🤣💀🤦🏻‍♂️

The level of Jew criminality on display here is simply BREATHTAKING, folks. Get these deranged lunatics out of our country yesterday. For fuck's sake.🤣



In August 2013, McKinsey partners met with certain members of the Purdue Board of Directors (members of the family that controlled Purdue) to present McKinsey's findings and proposal; as one McKinsey partner reported afterwards, "[b]y the end of the meeting the findings were crystal clear to everyone and they gave a ringing endorsement of 'moving forward fast.'" McKinsey also described for Purdue the financial value at stake: "hundreds of millions, not tens of millions."
For Purdue and McKinsey, E2E was a financial success. Their targeting of High Value Prescribers slowed OxyContin's declining sales and kept Purdue's profits flowing at the expense of public health. After the conclusion of McKinsey's work for Purdue on E2E, McKinsey performed additional work with Purdue that also sought to maximize OxyContin sales by further targeting sales efforts to High Value Prescribers.
Obstruction of Justice by Former McKinsey Senior Partner
According to the charging documents filed today, Elling served as the Director of the client services team for approximately 30 of McKinsey's engagements with Purdue. He had a senior, relationship-focused role with respect to the E2E engagement and was involved in securing the engagement for McKinsey. On July 4, 2018, Elling allegedly emailed another senior partner: "Just saw in the FT that [Purdue board member] is being sued by states attorneys general for her role on the [Purdue] Board. It probably makes sense to have a quick conversation with the risk committee to see if we should be doing anything other [than] eliminating all
TOP
justice.gov
our documents and emails. Suspect not but as things get tougher there someone might turn to us." According to court documents, forensic analysis of Elling's McKinsey-issued laptop found that Elling in fact removed materials related to McKinsey's work for Purdue from the laptop, as well as a Purdue-related folder from his Outlook email account.
Elling faces a maximum penalty of 20 years in prison, three years of supervised release and a fine up to $250,000 for the obstruction of justice charge. A federal district court judge will determine any sentence after considering the U.S. Sentencing Guidelines and other statutory factors.
False Claims to Federal Healthcare Programs
The department's civil False Claims Act settlement resolves allegations that, from 2013 to 2014, McKinsey US, by advising Purdue to turbocharge OxyContin marketing to High Value Prescribers, some of whom were already prescribing very large quantities of OxyContin, as a means to increase OxyContin sales, and despite its awareness of the opioid crises, thereby knowingly caused false and fraudulent claims for OxyContin to be submitted to Medicare, Medicaid, TRICARE, the Federal Employees Health Benefit Program and the Veterans Health Administration.
Along with the civil settlement, McKinsey US entered into a five-year Corporate Integrity Agreement with HHS-OIG. The CIA, HHS-OIG's first with a management consulting firm, contains novel obligations regarding risk assessment and quality control. First, the CIA requires McKinsey's Compliance Committee to establish a robust risk evaluation process, evaluating engagement risks and providing quality oversight for certain client deliverables. Second, it requires McKinsey to establish a Quality Review Program to assess the quality of McKinsey's advice to certain life sciences and health care clients with the dual goals of ensuring that McKinsey complies with applicable laws and does not provide or assist clients with plans, advice, or strategies that violate the law. HHS-OIG will select an independent Compliance Expert to review McKinsey's systems and processes under the Quality Review Program and to review a sample of Mck client engagements, including the advice provi those clients.

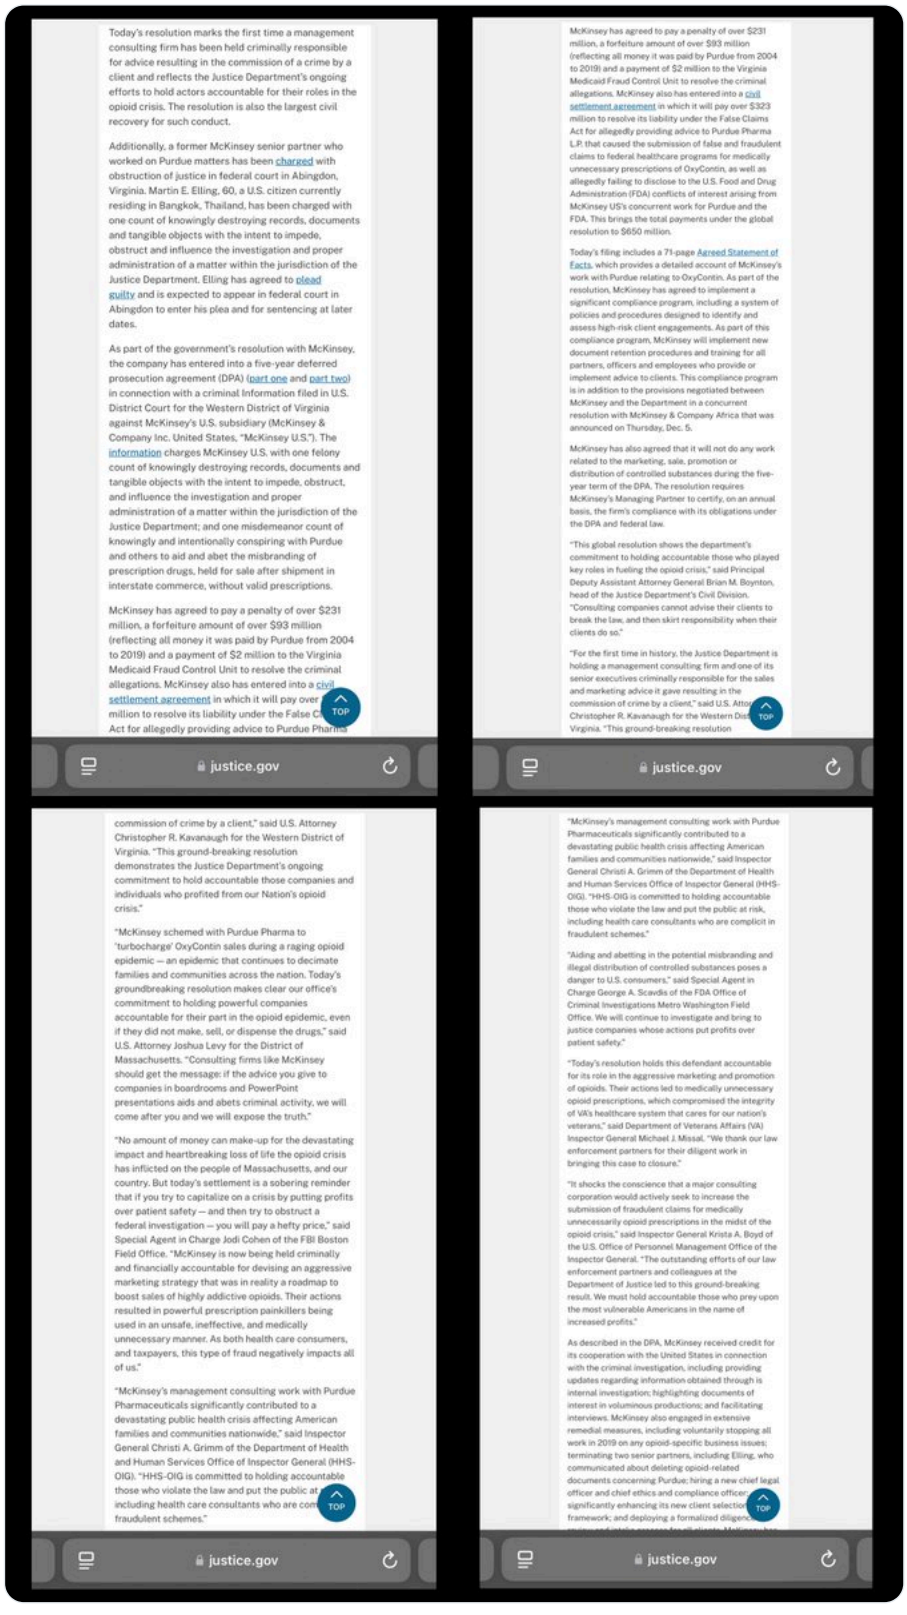
McKinsey Will Pay $650 Million, Cease Work Relating to Controlled Substances and Implement Significant New Compliance Measures
McKinsey & Company Inc. (McKinsey), a global management consulting firm based in New York, has agreed to pay $650 million to resolve a criminal and civil investigation into the firm's consulting work with opioids manufacturer Purdue Pharma L.P. (Purdue). The resolution pertains to McKinsey's advice to Purdue concerning the sales and marketing of Purdue's extended-release opioid drug, OxyContin, inclu
2013 engagement in which McKinsey advised
to "turbocharge" sales of OxyContin.
TOP
justice.gov



Today's resolution marks the first time a management consulting firm has been held criminally responsible for advice resulting in the commission of a crime by a client and reflects the Justice Department's ongoing efforts to hold actors accountable for their roles in the opioid crisis. The resolution is also the largest civil recovery for such conduct.

Additionally, a former McKinsey senior partner who worked on Purdue matters has been charged with obstruction of justice in federal court in Abingdon, Virginia. Martin E. Elling, 60, a U.S. citizen currently residing in Bangkok, Thailand, has been charged with one count of knowingly destroying records, documents and tangible objects with the intent to impede, obstruct and influence the investigation and proper administration of a matter within the jurisdiction of the Justice Department. Elling has agreed to plead guilty and is expected to appear in federal court in Abingdon to enter his plea and for sentencing at later dates.

As part of the government's resolution with McKinsey, the company has entered into a five-year deferred prosecution agreement (DPA) (part one and part two) in connection with a criminal Information filed in U.S. District Court for the Western District of Virginia against McKinsey's U.S. subsidiary (McKinsey & Company Inc. United States, "McKinsey U.S."). The information charges McKinsey U.S. with one felony count of knowingly destroying records, documents and tangible objects with the intent to impede, obstruct, and influence the investigation and proper administration of a matter within the jurisdiction of the Justice Department; and one misdemeanor count of knowingly and intentionally conspiring with Purdue and others to aid and abet the misbranding of prescription drugs, held for sale after shipment in interstate commerce, without valid prescriptions.

McKinsey has agreed to pay a penalty of over $231 million, a forfeiture amount of over $93 million (reflecting all money it was paid by Purdue from 2004 to 2019) and a payment of $2 million to the Virginia Medicaid Fraud Control Unit to resolve the criminal allegations. McKinsey also has entered into a civil settlement agreement in which it will pay over $323 million to resolve its liability under the False Claims Act for allegedly providing advice to Purdue Pharma L.P. that caused the submission of false and fraudulent claims to federal healthcare programs for medically unnecessary prescriptions of OxyContin, as well as allegedly failing to disclose to the U.S. Food and Drug Administration (FDA) conflicts of interest arising from McKinsey US's concurrent work for Purdue and the FDA. This brings the total payments under the global resolution to $650 million.

Today's filing includes a 71-page Agreed Statement of Facts, which provides a detailed account of McKinsey's work with Purdue relating to OxyContin. As part of the resolution, McKinsey has agreed to implement a significant compliance program, including a system of policies and procedures designed to identify and assess high-risk client engagements. As part of this compliance program, McKinsey will implement new document retention procedures and training for all partners, officers and employees who provide or implement advice to clients. This compliance program is in addition to the provisions negotiated between McKinsey and the Department in a concurrent resolution with McKinsey & Company Africa that was announced on Thursday, Dec. 5.

McKinsey has also agreed that it will not do any work related to the marketing, sale, promotion or distribution of controlled substances during the five-year term of the DPA. The resolution requires McKinsey's Managing Partner to certify, on an annual basis, the firm's compliance with its obligations under the DPA and federal law.

"This global resolution shows the department's commitment to holding accountable those who played key roles in fueling the opioid crisis," said Principal Deputy Assistant Attorney General Brian M. Boynton, head of the Justice Department's Civil Division. "Consulting companies cannot advise their clients to break the law, and then skirt responsibility when their clients do so."

"For the first time in history, the Justice Department is holding a management consulting firm and one of its senior executives criminally responsible for the sales and marketing advice it gave resulting in the commission of crime by a client," said U.S. Attorney Christopher R. Kavanaugh for the Western District of Virginia. "This ground-breaking resolution demonstrates the Justice Department's ongoing commitment to hold accountable those companies and individuals who profited from our Nation's opioid crisis."

"McKinsey schemed with Purdue Pharma to 'turbocharge' OxyContin sales during a raging opioid epidemic — an epidemic that continues to decimate families and communities across the nation. Today's groundbreaking resolution makes clear our office's commitment to holding powerful companies accountable for their part in the opioid epidemic, even if they did not make, sell, or dispense the drugs," said U.S. Attorney Joshua Levy for the District of Massachusetts. "Consulting firms like McKinsey should get the message: if the advice you give to companies in boardrooms and PowerPoint presentations aids and abets criminal activity, we will come after you and we will expose the truth."

"No amount of money can make-up for the devastating impact and heartbreaking loss of life the opioid crisis has inflicted on the people of Massachusetts, and our country. But today's settlement is a sobering reminder that if you try to capitalize on a crisis by putting profits over patient safety — and then try to obstruct a federal investigation — you will pay a hefty price," said Special Agent in Charge Jodi Cohen of the FBI Boston Field Office. "McKinsey is now being held criminally and financially accountable for devising an aggressive marketing strategy that was in reality a roadmap to boost sales of highly addictive opioids. Their actions resulted in powerful prescription painkillers being used in an unsafe, ineffective, and medically unnecessary manner. As both health care consumers, and taxpayers, this type of fraud negatively impacts all of us."

"McKinsey's management consulting work with Purdue Pharmaceuticals significantly contributed to a devastating public health crisis affecting American families and communities nationwide," said Inspector General Christi A. Grimm of the Department of Health and Human Services Office of Inspector General (HHS-OIG). "HHS-OIG is committed to holding accountable those who violate the law and put the public at risk, including health care consultants who are complicit in fraudulent schemes."

"Aiding and abetting in the potential misbranding and illegal distribution of controlled substances poses a danger to U.S. consumers," said Special Agent in Charge George A. Scavdis of the FDA Office of Criminal Investigations Metro Washington Field Office. We will continue to investigate and bring to justice companies whose actions put profits over patient safety."

"Today's resolution holds this defendant accountable for its role in the aggressive marketing and promotion of opioids. Their actions led to medically unnecessary opioid prescriptions, which compromised the integrity of VA's healthcare system that cares for our nation's veterans," said Department of Veterans Affairs (VA) Inspector General Michael J. Missal. "We thank our law enforcement partners for their diligent work in bringing this case to closure."

"It shocks the conscience that a major consulting corporation would actively seek to increase the submission of fraudulent claims for medically unnecessarily opioid prescriptions in the midst of the opioid crisis," said Inspector General Krista A. Boyd of the U.S. Office of Personnel Management Office of the Inspector General. "The outstanding efforts of our law enforcement partners and colleagues at the Department of Justice led to this ground-breaking result. We must hold accountable those who prey upon the most vulnerable Americans in the name of increased profits."

As described in the DPA, McKinsey received credit for its cooperation with the United States in connection with the criminal investigation, including providing updates regarding information obtained through is internal investigation; highlighting documents of interest in voluminous productions; and facilitating interviews. McKinsey also engaged in extensive remedial measures, including voluntarily stopping all work in 2019 on any opioid-specific business issues; terminating two senior partners, including Elling, who communicated about deleting opioid-related documents concerning Purdue; hiring a new chief legal officer and chief ethics and compliance officer; significantly enhancing its new client selection framework; and deploying a formalized diligence
